1) You are going set up a company with a pharmacist as your co-director which will own and run a community pharmacy. Using the information in modules 1 and 2:
   a. Explain what you would need to consider when deciding upon the name of your pharmacy?
   
   b. Who must you register the pharmacy with?
   
   c. You wish to have an NHS pharmacy contract, who can help you obtain one and who would the contract be with in your local area?
   
   d. Once you have an NHS contract and have opened your pharmacy, explain who may inspect the premises and what they will be checking?
e. Explain what health and safety assessments you need to do in your premises to comply with Health and Safety legislation.

f. Once you have recruited staff, explain what specific health and safety training they will receive to work in your pharmacy.
g. Please explain how each of the following legislation will impact on services within your new pharmacy:

Consumer Protection Act

Trade Descriptions Act

Weights and Measures Act

Freedom of Information Act

Equality Act
2) Explain how you comply with the Data Protection and the Caldicott principles in your place of work.

3) Explain how legislations towards the safeguarding of children can impact on the delivery of services to under 16s in a pharmacy.
4) Devise an information booklet for patients in your area explaining how the NHS works. You should include:
   - A description of primary and secondary care and their functions
   - Named primary and secondary care facilities in your local area
   - How to access these different parts of the NHS

   It should be approximately 300 words and be on a sheet of A4 folded in half. It can contain diagrams or pictures you have produced, and can be handwritten or computer generated.

   (Please attached it to the back of this assignment)

5) Explain how these organisations help with the delivery of pharmacy services:
   a. NICE/SIGN
   b. NHS Business Service Authority/NHS National Service Scotland/ NHS Wales Informatics Service
   c. NHS Direct
6) Pharmacy technician registration will become mandatory in 2011.
   a. Who will you need to register with and when will you be able to do this?
   b. Explain what you will need to do to remain registered?
   c. Explain how the role of a pharmacy technician has diversified and compare the differences between community and hospital practice.
